[Story]

WAR HAS COME TO THE WORLD!

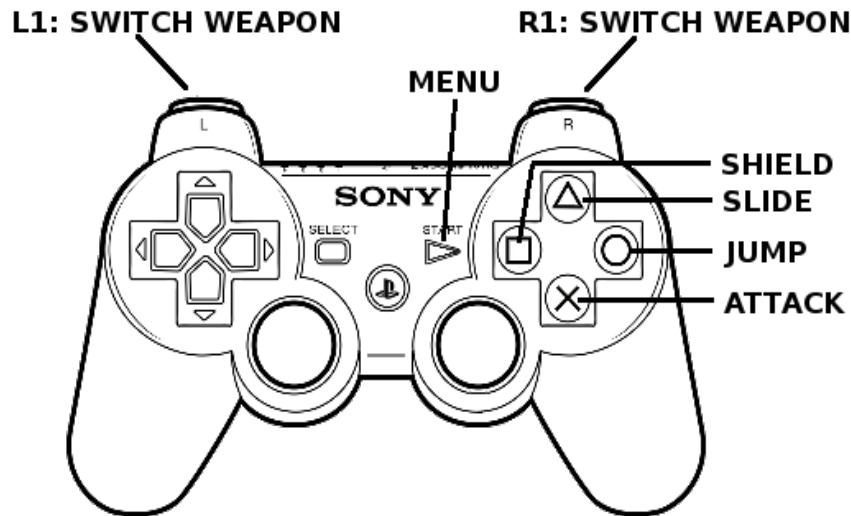

In the year 20XX, the city of Kyoto rests peacefully, but danger casts a shadow in the horizon as news from Tokyo speak of robots going berserk

Suddenly, explosions plague the city, marking the start of a war. An army of robots with unknown origin is attacking! The city defense forces are unable to stop their advance. Facing an eminent defeat, the army calls for help from the city university's scientists. They need to create weapons to defeat the new enemy.

Inspired by news of a robot hero in Tokyo, young professor Kanotus creates a robot warrior project. But his first creation, called Beta, is too temperamental and unstable; he then creates a second robot, called Rockbot, with improved design, to fight along. Now, both robots need to rush to save the city and try become heroes.

[Using the control & Commands]

- Hold down key and press jump to dash with Betabot or slide with Rockbot.
- With Rockbot, hold attack button to charge and release it to fire a powerful attack.
- Rockbot have use shield to reflect projectiles coming in his direction.

Playstation 2

Android

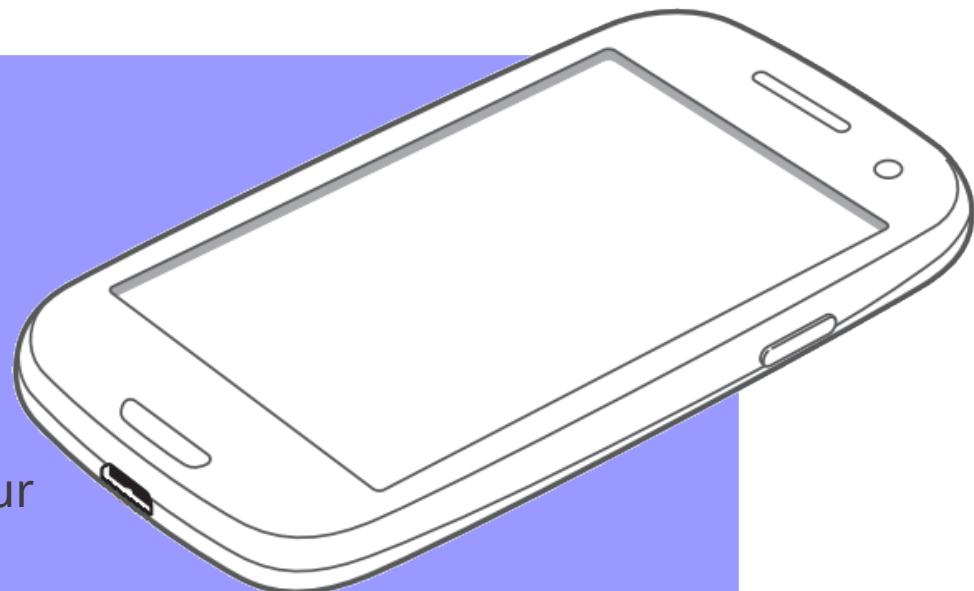

Touch Controls*:

A Button — Jump

B Button — Attack

Start — Open Weapon Select Menu & Make Selection

* You can also configure a bluetooth or USB joystick, or use built-in controls if your hardware have any.

[Game Start]

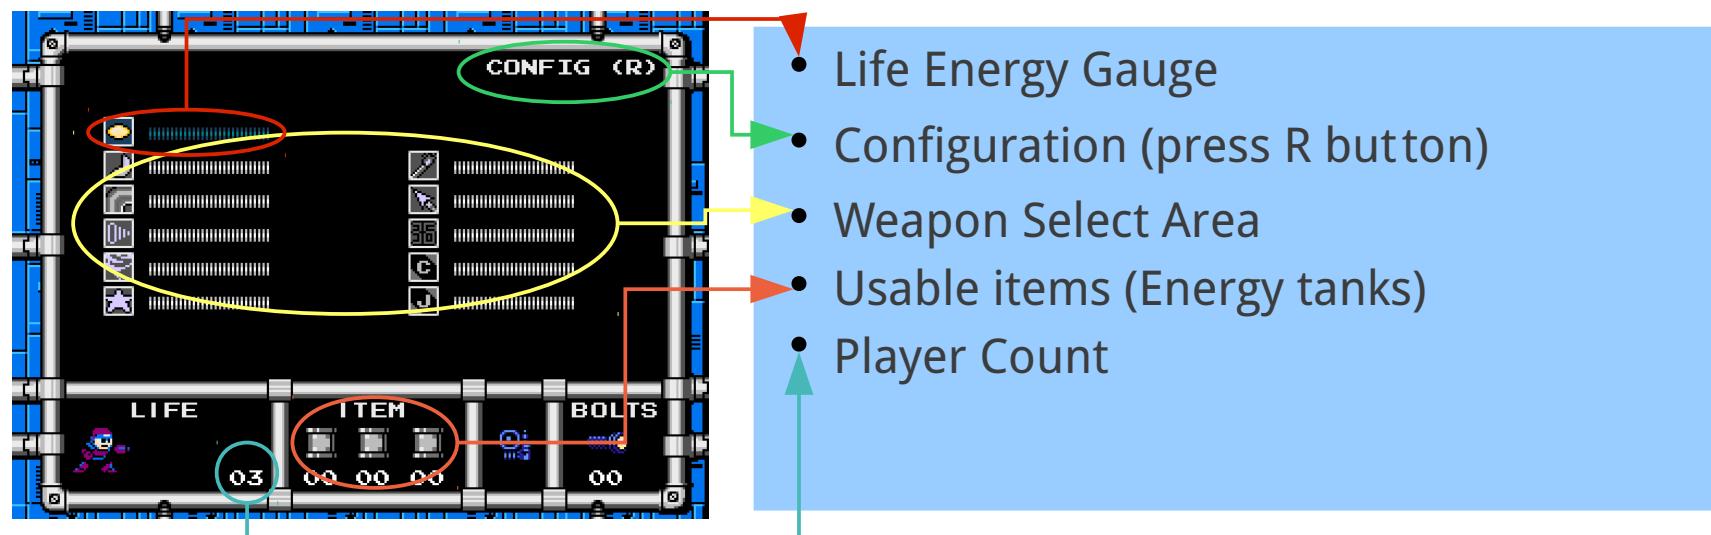

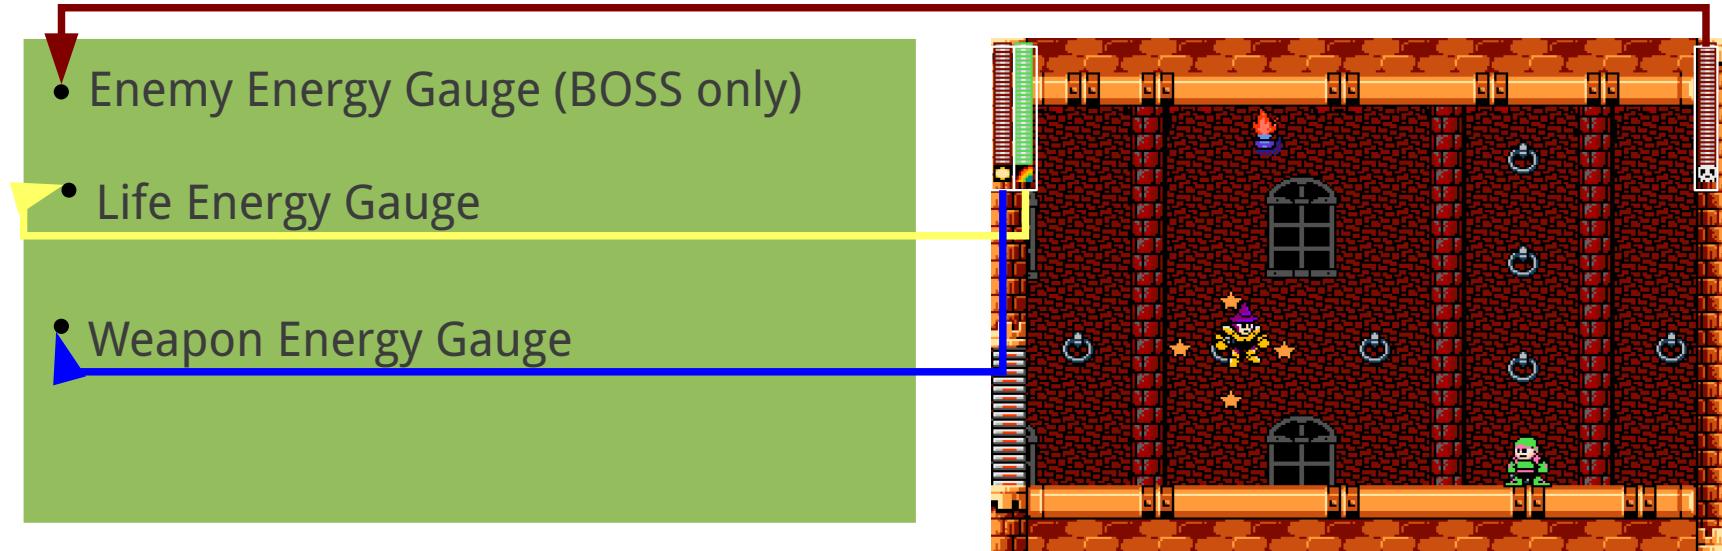

When starting the game, a player selection screen allows you to pick between Rockbot and Betabot. Rock is easier to play with due to bigger jump and charged shot, while Beta matches classic Mega Man (tm Capcom) play.

After defeating the introduction stage, the 8 boss characters of each stage are displayed on the screen. Begin playing any stage by moving the cursor over that character's image and pressing the Start Button.

After defeating the boss of each stage, you will obtain the weapon wielded by that boss.

[Screen Explanation]

[ABOUT CHANGING WEAPONS]

Cockpit

After defeating a boss and acquiring its weapon, pressing the Start Button during the game will enable switching weapons by opening the weapon display area.

By moving the Directional Key Pad up down left and right, select the initials of the weapon you wish to use and press start to confirm your selection!

[Frog and Eagle Mascots]

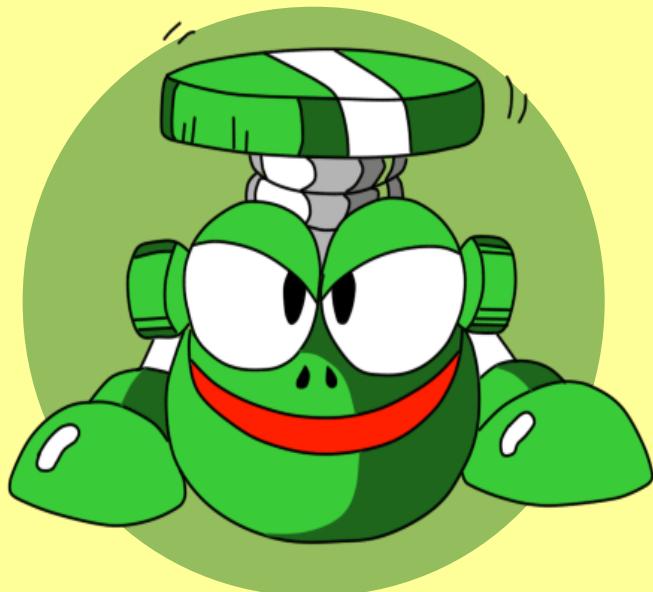

Rockbot and Betabot have two companion friends which can be selected for use in the same manner as choosing a weapon.

Coil Frog helps you to reach high places and Eagle Jet helps to fly over obstacles or pits. The two friends can only be acquired by defeating certain bosses.

In both cases, they cannot appear on the screen more than once at a time.

[Frog Coil]

Frog Coil

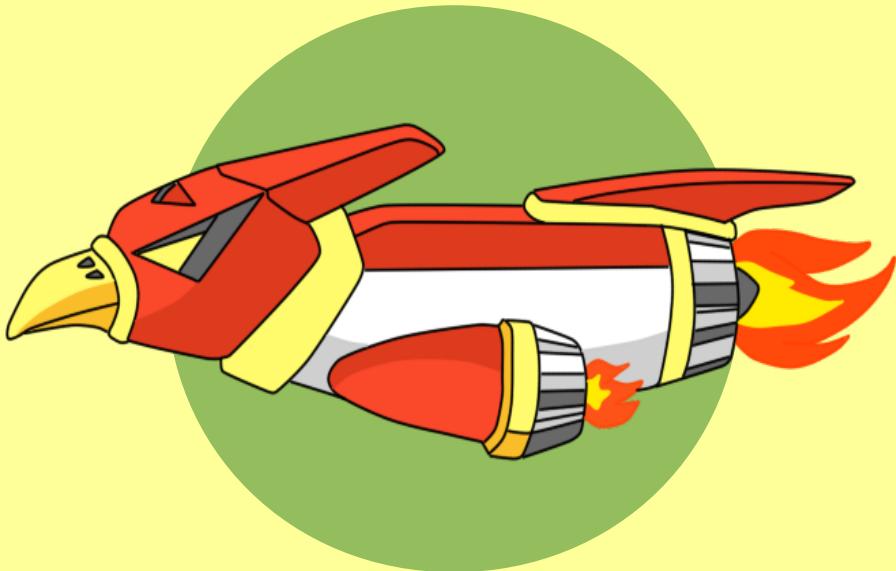

This ability is available after beating Ape Bot's stage. Get atop Frog to perform a super jump and reach higher areas.

[Eagle Jet]

Soars freely through the air.
Watch its energy usage
carefully or you can fall!!

(WARNING)

Cancelling Eagle while
moving over a danger zone
or an area without footholds
will cause the player to drop
and fall. Please use
caution.

Eagle Jet

[Using Slide/Dash]

By holding the Directional Key Pad down and pressing the JUMP button, the player can perform a slide to get out of many tough situations!!

By using this nimble burst of speed, you can slide underneath and slip past your enemies, and that's not all!!

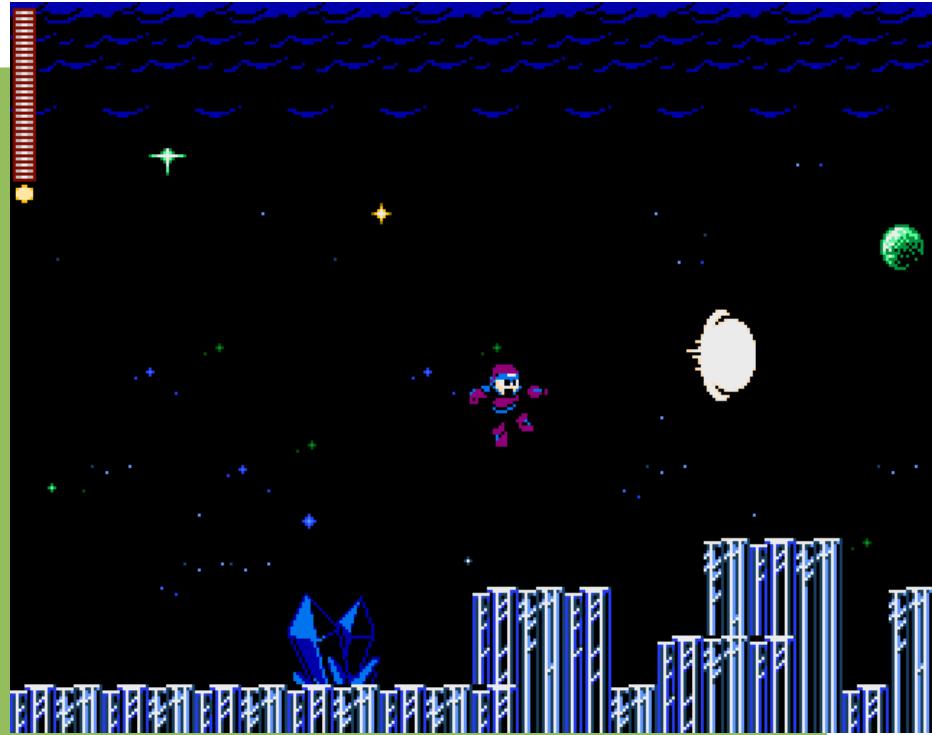

There are some narrow passageways that can only be traversed by sliding!!

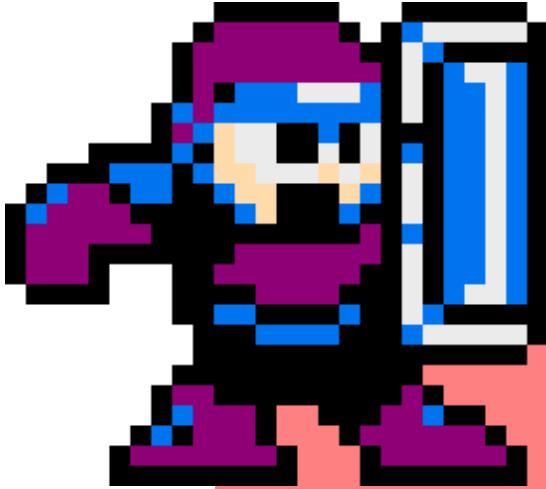

[Rockbot's Charged Shot]

When playing with Rockbot, press and hold down the Attack button and he will start charging his weapon. Release the button to fire up a powerful attack that can defeat strong enemies on a single shot!

Betabot can't charge, but fires two shots at once, making easier to hit difficult target.

[Using Rockbot's Shield]

When pressing the shield button with Rockbot, he will raise his shield to protect himself from enemies projectiles by reflecting those.
Betabot is not equipped with a shield.

Warning

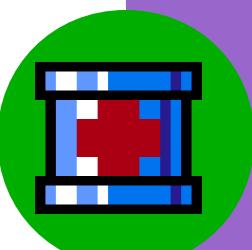

You are still vulnerable if a projectile comes from the opposite direction you are facing and also from damage from contact with enemy body.

[About Items]

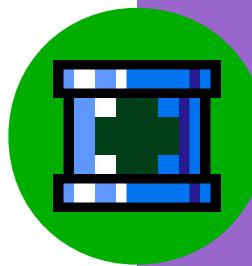

1UP

Player count increases by 1 man.

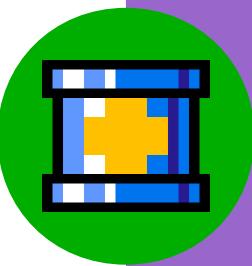

Energy Can

When this item is used, all life energy is fully recovered.

THE STORY OF ROCKBOT

ROCKBOT STORY

In the year 200X, industrial use humanoid robots have been created thanks to the steady progress of science. These robots can work round the clock tirelessly 24 hours a day, at a superhuman rate.

Then one day, some shocking news arise in Tokyo: "The robots have begun going out of control one after another! At this rate, mankind will be ruled by robots!"

Fearing to have the same destiny, the city of Kyoto prepare for the worse. One night, the fear becomes truth, an horde of unknown robots attack.

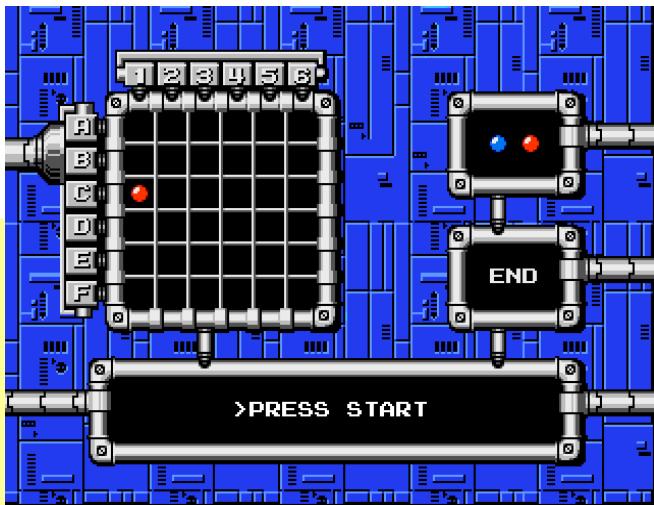

Being unable to stop the enemies, the city security forces call for help from the university's scientists in order to create warrior that match the enemies strength One professor comes with a project for fighter robots. After his first construct is unstable and unwary, he improves the project and build other one to fight along.

Now, even without being fully tested and stable, both robots, born to fight, will have to prove their value and become heroes saving the city.

Go! Go! BETABOT and ROCKBOT!! Only you can defeat the 8 robot masters, and find out who is responsible for this violence!

[About Password]

After clearing a stage or getting a Game Over, a password like the one in the image above will be displayed. The bosses you've defeated, as well as the weapons and items you've obtained will be stored in the password according to the location of the chips. (The player count is not saved, however.)

Come time to input the password, use the A Button to select a chip color, then move the cursor to the proper location and press the A Button again to place each chip.

The A Button can also be used to remove a chip that's already been placed.
